

AI-ENABLED RADIOS FOR DYNAMIC SPECTRUM SHARING

Ingrid Moerman (imec - Ghent University, Belgium)

Ivan Seskar (Rutgers University, USA)

Presenter: Brecht Vermeulen (imec - Ghent University, Belgium)

SPECTRUM COLLABORATION CHALLENGE

OPEN COMPETITION

WIRELESS NETWORKS

SPECTRUM SHARING

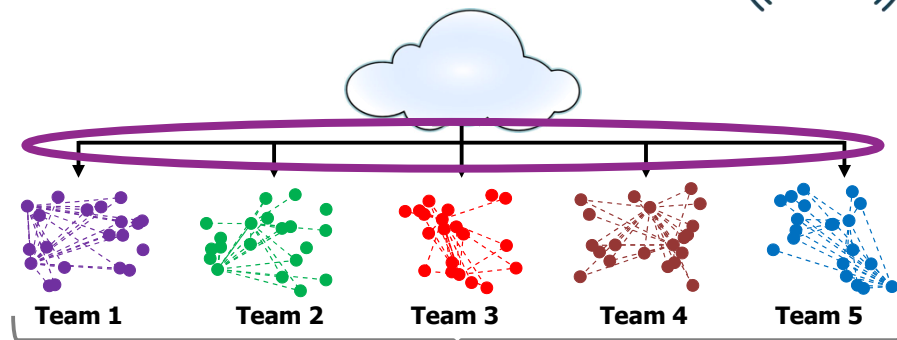

NO PLANNING
COMMUNICATION INFRASTRUCTURE
STANDARDISED RADIO TECHNOLOGIES

INTELLIGENCE

LEARN TO ADAPT

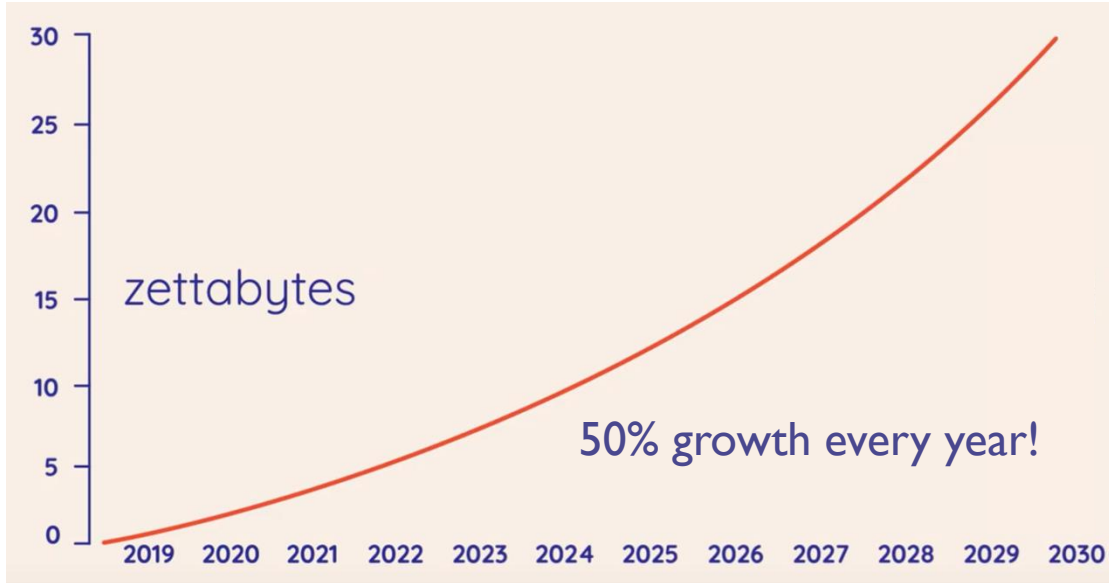

COLLABORATION

OPTIMIZE SPECTRUM CAPACITY

WHY SPECTRUM SHARING

GROWING DEMAND OF WIRELESS TRAFFIC

< 6 GHz spectrum
cannot grow!

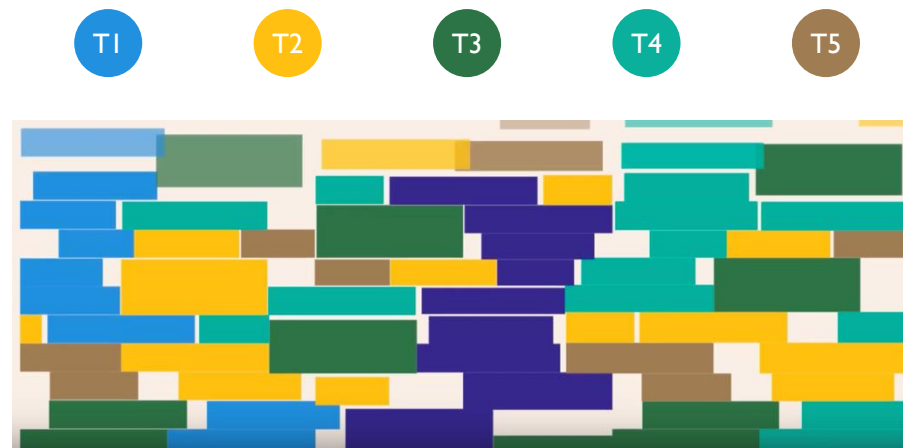

Source: Darpa SC2, <https://youtu.be/cd3kCPvaXOw>

MOVE AWAY FROM ISOLATION OF SPECTRUM

ISOLATION

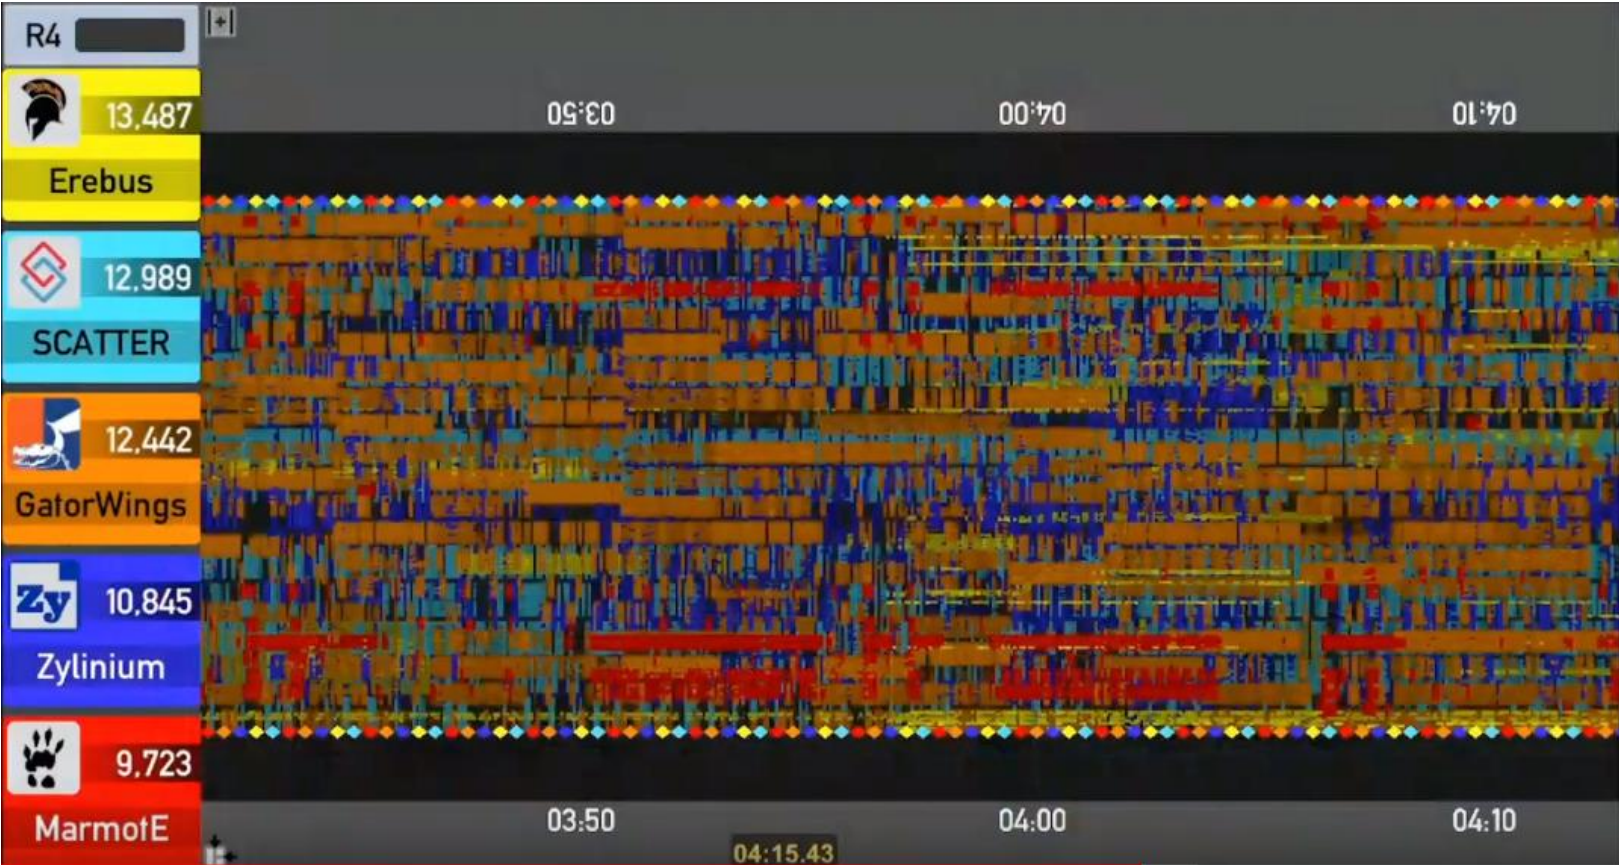

AUTONOMY &
SPECTRUM COLLABORATION

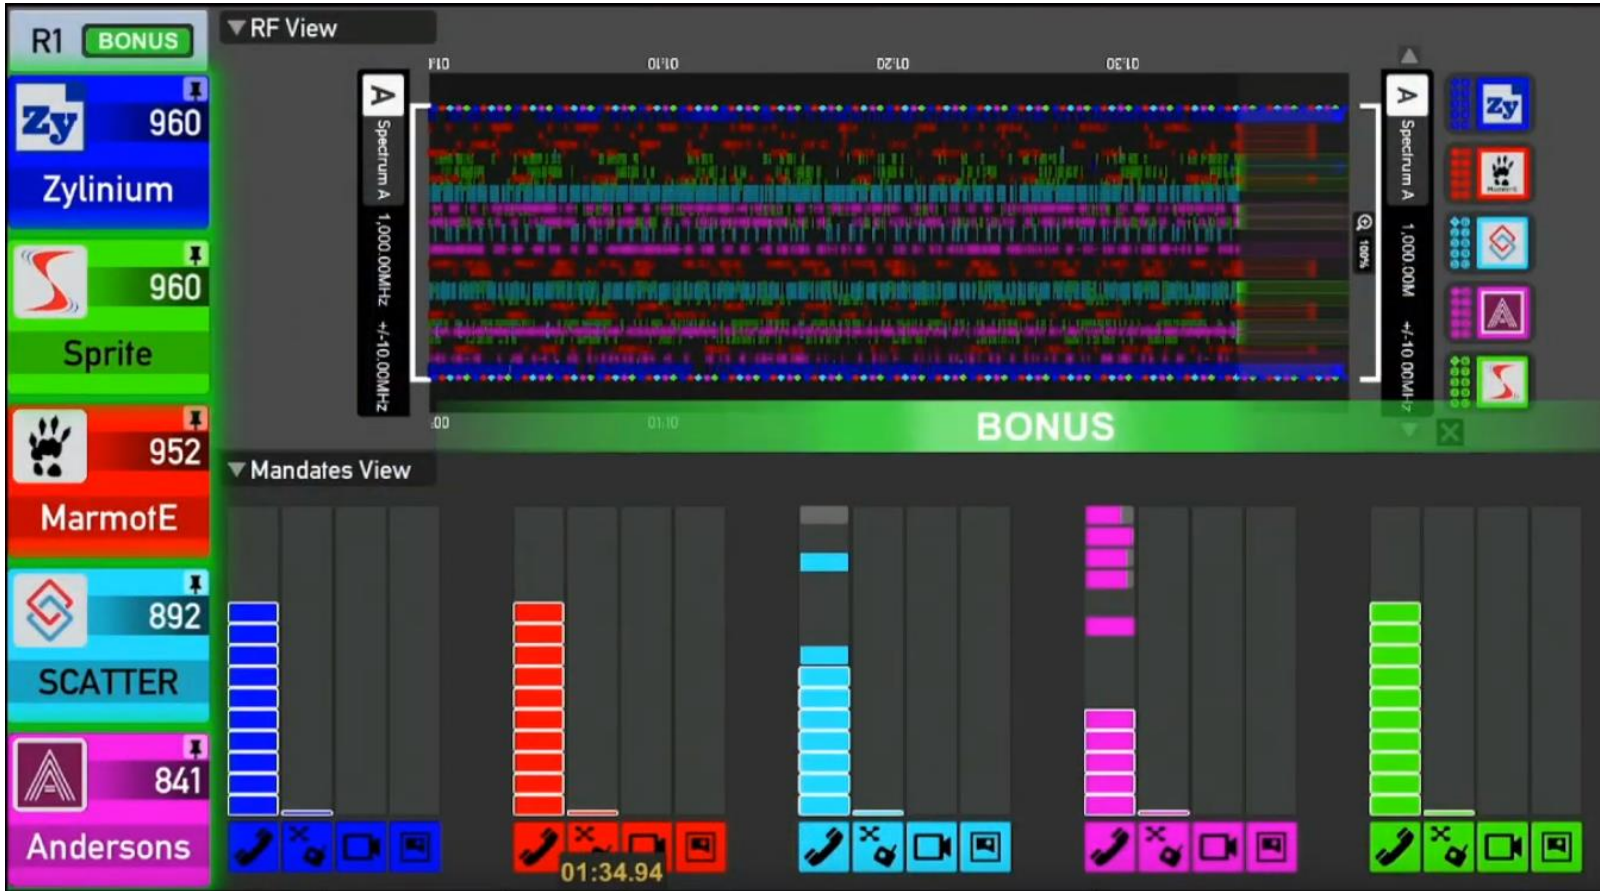

Spectrum silos lead to overdimensioning and waste of spectrum

EXAMPLE OF SPECTRUM SHARING

EXAMPLE OF MANDATES ACHIEVED

PLAYGROUND FOR EXPERIMENTATION

INTELLIGENT RADIOS (SDR, CPU, GPU) + ENVIRONMENT EMULATION

DARPA COLOSSEUM
(US)

IMEC Virtual wall, GPU Lab, w-iLab.t
mini-Colosseum
(EU)

RUTGERS Orbit testbed
(US)

TEAM SCATTER: DOUBLE PRIZE WINNER + FINALIST @ MWC (LA)

Dec 2017: 750 000 USD prize

Dec 2018: 750 000 USD prize

Oct. 2019: finalist, 6th position (out of 10)

LESSONS LEARNED

- Spectrum sharing outperforms spectrum isolation, but this is just the start... **MORE RESEARCH & EXPERIMENTATION REQUIRED**
- Centralized control (cf. 5G) versus autonomy (distributed intelligence & decisions in SC2)... **DO NOT IGNORE END DEVICES: NEED FOR OPEN SOURCE SDR PLATFORMS**
- Per flow QoS support... **NO MORE NEED FOR OVERDIMENSIONING OF CAPACITY TO REALIZE QoS**
- DARPA SC2 solutions are technology agnostic, multiple radio technologies can live together in harmony... **COLLABORATION PROTOCOL NEEDS FURTHER ATTENTION**
- Colosseum is a facilitator for continued cross-continental collaborative research, but **WILL NON-US RESEARCHERS BE ABLE TO ACCESS COLOSSEUM FURTHER ON?**

WHAT'S NEXT?

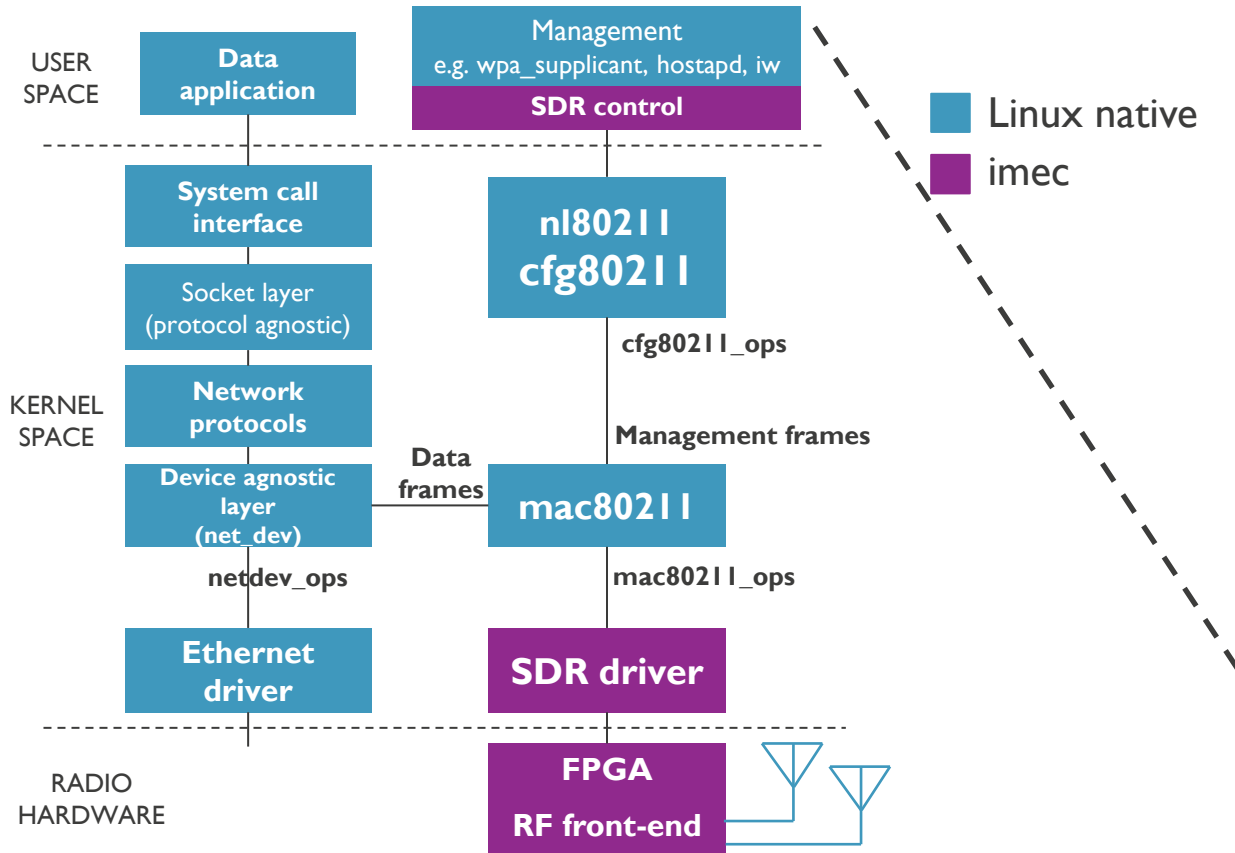

OPEN SOURCE SDR PLATFORMS!

- **srsLTE (SRS)**: packet-based & resource-optimized LTE version used in DARPA SC2
- **OAI (Eurecom)**: 5G NR to be used in POWDER testbed for validation of DARPA solutions in outdoor wireless environment (mandatory for DARPA prize winners)
- **Open-Wi-Fi (imec)**
 - First FREE open source full stack real-time Wi-Fi
 - Developed in ORCA and to be launched in January 2020 (GPLv3)
 - Implemented on Xilinx SoC: FPGA with embedded ARM and Linux
 - With the native Linux driver framework, SDR behaves like a commercial Wi-Fi card
 - Talks to commercial devices, and also allows easy customization
 - Roadmap: .ax features (numerology, OFDMA, colouring...)

 Openwifi

Open source full stack real-time SDT WiFi on FPGA with embedded ARM and Linux

TEAM SCATTER THANKS YOU
